Orbograph's Key-Pay[®] Convene Solution Gains Momentum in Remittance & Remote Deposit Markets

AudioTel's first RemitPlus[®] customer enters into production testing, second customer signs contract

Billerica, MA, August 12, 2007 – Orbograph Ltd., in cooperation with its value added reseller AudioTel Corporation, announced today that Arizona Lockbox & Fulfillment, a retail lockbox primarily servicing state and local government, tax and not-for-profit organizations, has begun production testing of Orbograph's Key-Pay[®] Convene for business process outsourcing (BPO) of data entry. Arizona Lockbox will be the first AudioTel RemitPlus client to use RemitPlus' integrated Key-Pay[®] Convene solution.

Key-Pay[®] Convene is an embedded BPO solution which automatically sends image snippets of only those individual fields in a form, or amount fields of a check, that contain characters which cannot be read by the recognition engine to a virtually unlimited pool of data repair personnel. In order to satisfy the highest quality demands, Key-Pay[®] Convene provides constant system monitoring for the end user client. Through this innovative implementation of web-services technology, end-user clients can reduce labor costs for the data entry process by an estimated 30%.

"Arizona Lockbox is constantly looking for workflow improvements. RemitPlus' Convene upgrade will enable us to improve the processing turnaround time for our clients and reduce per item fees thus providing us with a competitive advantage in our industry," commented Ron Edens Jr., Vice President of Arizona Lockbox.

Fred Campos, Vice President of Remittance Products for AudioTel, states that the Arizona Lockbox deal validates the strategic value AudioTel initially saw in the Convene product. "Our initial success with AZ Lockbox confirmed our own analysis of the value of Convene for higher volume lockboxes. What we under-estimated was just how important this functionality is to the Remote Deposit Capture (RDC) market. These customers may have a few thousand or possibly only a few hundred transactions per day, and could never afford to contract for direct outsourcing; yet they want to avoid having their own employees keying transactions. Having a "hands-off" BPO solution embedded in our RemitPlus product line for RDC has been very well received by our customers. Our second RemitPlus sell with Convene to Goodwill Rescue Missions proves the point."

Goodwill Rescue Mission, a RDC customer will be implementing Convene within the next several months. Reverend Daniel Shaw, Director of Development for the Goodwill Rescue Mission, stated, "We chose RemitPlus with Key-Pay[®] Convene because we felt it would give us better speed and accuracy at a lower cost than we could achieve internally. As a result of using Convene, our existing employees are freed up for higher value-added activities."

Barry Cohen, President of Orbotech, Inc. and General Manager of Orbograph Ltd., stated, "There is a niche in the remittance and RDC markets which Convene can fill, so we have created a partnership program that is of high value to both end-user clients and business partners. We expect to achieve the same great results in this market as we did earlier this year by surpassing a 2M daily keying volume with Orbograph's Apex[™] Key-Pay[®] solution in POD processing."

About Orbograph

Orbograph (www.orbograph.com), a subsidiary of Orbotech (NASDAQ/NM SYMBOL: ORBK), is a leading developer of recognition solutions for the U.S. check processing and business process outsourcing markets. Orbograph's technologies are in use at hundreds of banks and financial institutions and service bureaus across North America, processing millions of documents each day.
